Supplier On-boarding Solutions

Driving supplier and organisation change

Solution overview

To truly leverage the value of supplier change management and your Purchase to Pay (P2P) solution you need to engage, interact and take the supplier with you on the journey.

B2BE has a range of solutions to help with supplier on-boarding. From automated self on-boarding via the P2P Portal through to managed roll-out and on-boarding for your supplier EDI solutions.

B2BE can help you create your electronic community in the most efficient way to leverage the investments made as part of your organisations automation and P2P journey.

Key Features

Automated supplier on-boarding

The supplier on-boarding workflow allows you to setup automatic on-boarding. If the suppliers details match what you hold in your system you can automatically on-board the supplier with no human intervention onto your supplier portal.

Supplier approval workflow

If you prefer to approve supplier on-boarding requests the workflow automatically notifies you when a supplier has requested access and you can manually review them and accept or reject their access.

B2BE assisted on-boarding

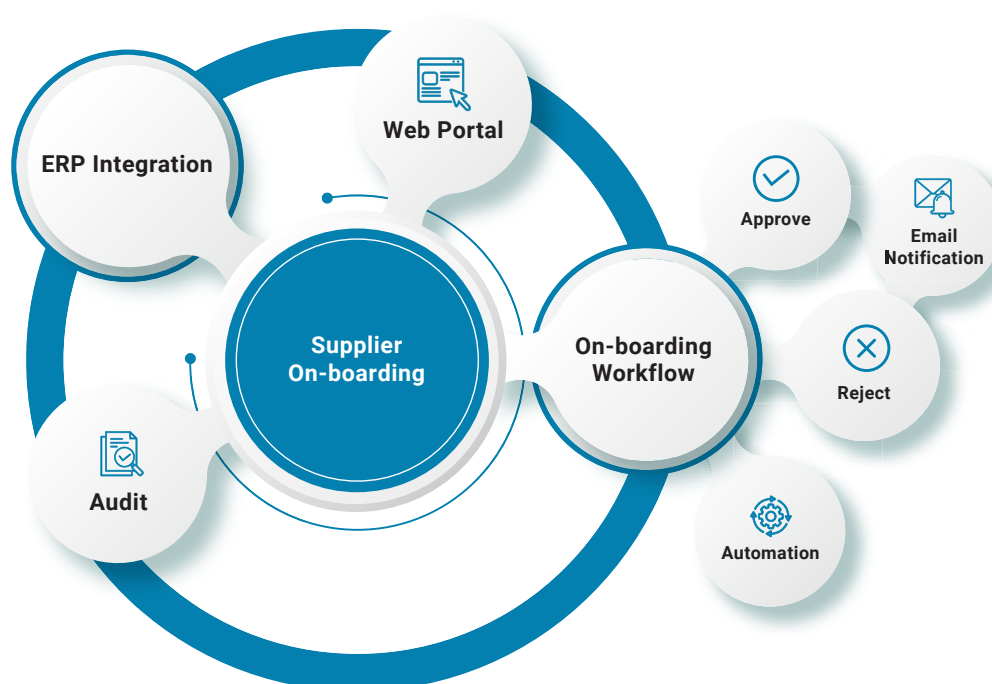

Of course B2BE can also manage on-boarding. This maybe access to the P2P Portal or with EDI integration, testing and setup. B2BE's involvement can be a little or a lot.

Reporting

There are a number of reports for suppliers who have been on-boarded so you can keep track of this throughout the supplier engagement process.

Dashboard and application dashlets

Similarly there are snapshot dashlets to report supplier on-boarding in a quick and simple to view way via the Purchase to Pay Portal.

What you can achieve with B2BE's Supplier On-boarding solutions

Collaboration

By being able to on-board your suppliers easily on your P2P journey means you will be able to collaborate electronically with them more rapidly and interactions with suppliers will become more meaningful and focused where they need to be and less time spent on the day-to-day.

Easy to use solutions

All the on-boarding solutions are easy to use cloud based so if you want to on-board suppliers or if you want suppliers to self-on-board it's a very easy process. Of course when B2BE helps to onboard your EDI capable suppliers it becomes easier still.

Self fulfilment

When a supplier has the tools available, via the Purchase to Pay Portal once on-boarded, to be able to answer their own questions this by definition means your staff will spend less time fielding supplier queries and this is good for both parties.

Process and document cost reductions

Engaging with your suppliers electronically with an end to end P2P solution will not only improve processes it will help drive down costs of doing business which is always a key ROI for any P2P solution.

About B2BE

B2BE delivers electronic supply chain solutions globally, helping organisations to better manage their supply chain processes, providing greater levels of visibility, auditability and control. We're driven by a passion for what we do, inspired by innovation, and underpinned by a wealth of knowledge. With over 20+ years of experience, the B2BE teams operate worldwide.
