# Order to Cash Portal Solutions

## Order to Cash visibility and control

### Solution overview

**The Order to Cash Portal gives your organization the way in which you can collaborate with customers, between functions in your organization and more importantly giving you, and your customers if you want, access to B2BE's range of well crafted O2C solutions which are all tailored to automate, streamline and manage your supply chain.**

The Order to Cash Portal allows you to setup customers so they can access their documents, use accounts receivable and invoice payment solutions, manage their own users and much more. While the solution also means complex retail or branch networks can also be setup to give them greater visibility and control over their customer processes and automation.

### Key Features

**O2C solution access**
The Order to Cash Portal gives users access to all the B2BE O2C cloud based solutions in a single environment which is profile driven to ensure users only see what they should see and more importantly what they need.

## Secure access and O2C user management

Permissions mean you can add customers, your branches or retail networks and restrict what they access and can see to give everyone visibility of the solution to help with buy in. In fact, users can manage the setup of their own users and groups if required, even customers.

## Organization branding

The Order to Cash Portal can be branded to reflect your organizations' online look and feel and it can be accessed from your website, intranet or it can operate as a stand alone solution. Either way, users will feel like they're using your own tools and solutions.

## Document visibility

All the documents and transaction sets are available via the Order to Cash Portal which means all parties to the transactions have visibility of all documents that relate to them and also the documents that relate to one another to create a O2C transaction.

## O2C audit tools

All the B2BE solutions are auditable to ensure that any action can be recorded and reviewed at a later date if required. See who's configured what and when, which documents they've interacted with or viewed and all the access logs.

# What can you achieve with B2BE's Order to Cash Portal solutions

### Collaborative O2C environment

Collaborate in real time with your customers and organization to speed-up your O2C processes and collaborate more easily to ensure what your customer buys and pays for all align in the most efficient way possible.

### Single business tool

Having a window into your O2C processes for your organization, your branches or retail network, customers and any other related parties means everything is in one place and you don't need to flip from one system to another or speak to other functions in your organization to find the information you need.

### Powerful O2C tools

All B2BE's O2C solutions and tools are highly configurable, cloud based and easy to use which means the solutions can be tailored not only to the industry your organization operates in or services but more specifically to your organization, your users and customers.
