

DOCUMENT TRANSMISSION

SOLUTIONS DATA SHEET

100% DOCUMENT TRANSMISSION, NO MANUAL PROCESSES!

B2BE's document transmission solution means you can automate all the documents your organisation sends to its trading partners via B2BE. B2BE automatically takes the data and based on a set of rules, or based on the document distribution solution configuration, will send the document to your trading partners.

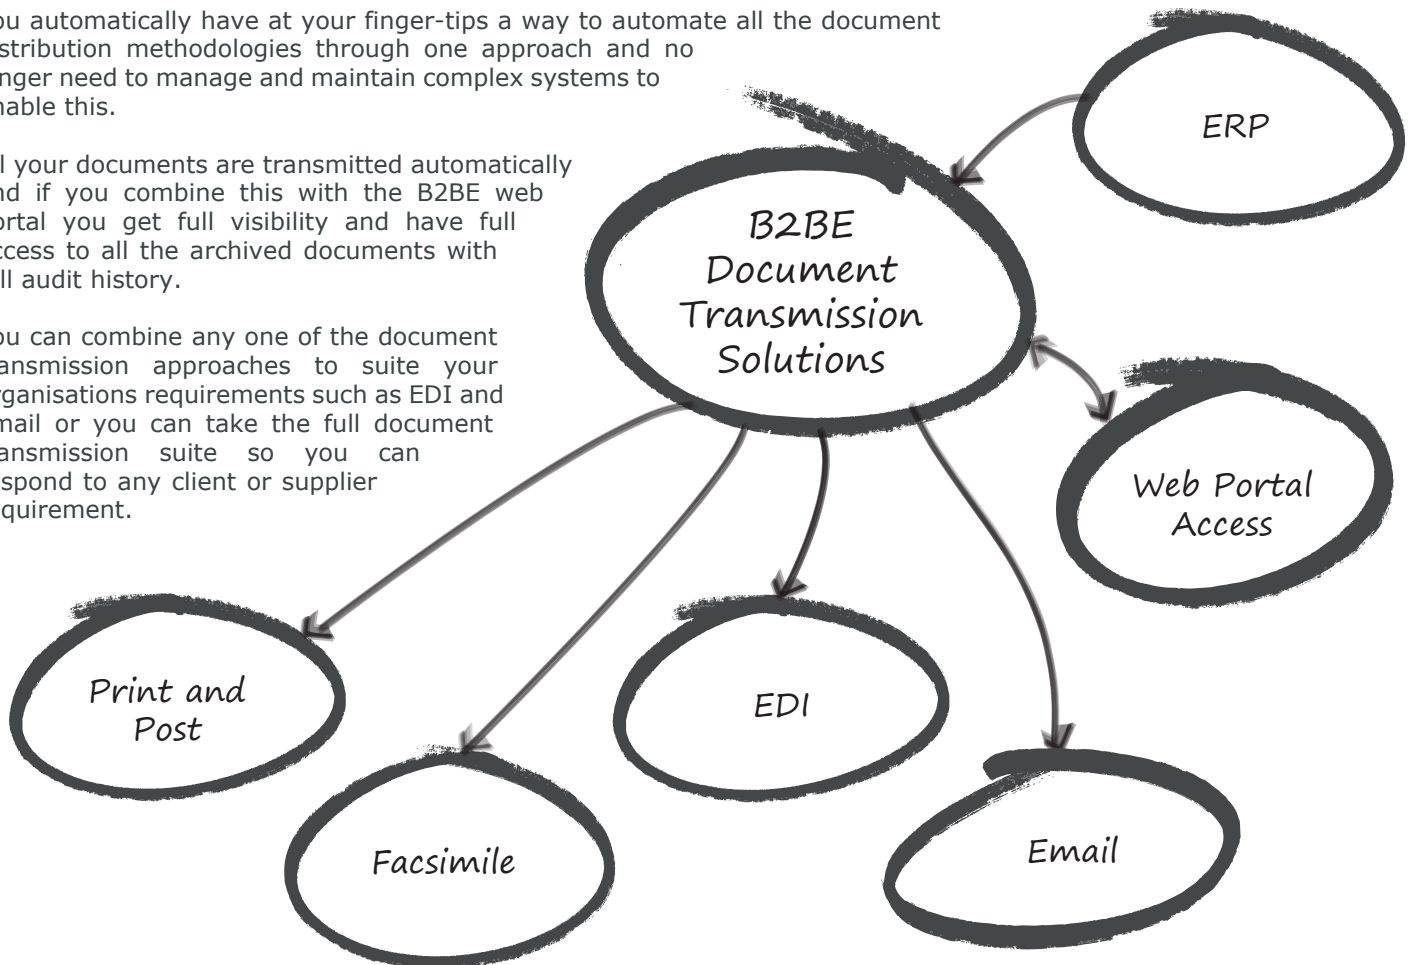

SOLUTION OVERVIEW

The B2BE document transmission solution allows your organisation to automate the data feed for a document to B2BE and B2BE will on-send the documents to your trading partners based on the defined parameters which could include; EDI, email, facsimile or post, for example.

You automatically have at your finger-tips a way to automate all the document distribution methodologies through one approach and no longer need to manage and maintain complex systems to enable this.

All your documents are transmitted automatically and if you combine this with the B2BE web portal you get full visibility and have full access to all the archived documents with full audit history.

You can combine any one of the document transmission approaches to suite your organisations requirements such as EDI and email or you can take the full document transmission suite so you can respond to any client or supplier requirement.
