PROCUREMENT SOLUTIONS

SOLUTIONS DATA SHEET

NEED A PROCUREMENT SOLUTION TO CREATE YOUR PURCHASE TO PAY ENVIRONMENT?

B2BE's procurement solutions facilitate many areas within the procurement process to provide a sophisticated, yet straight forward, procurement environment.
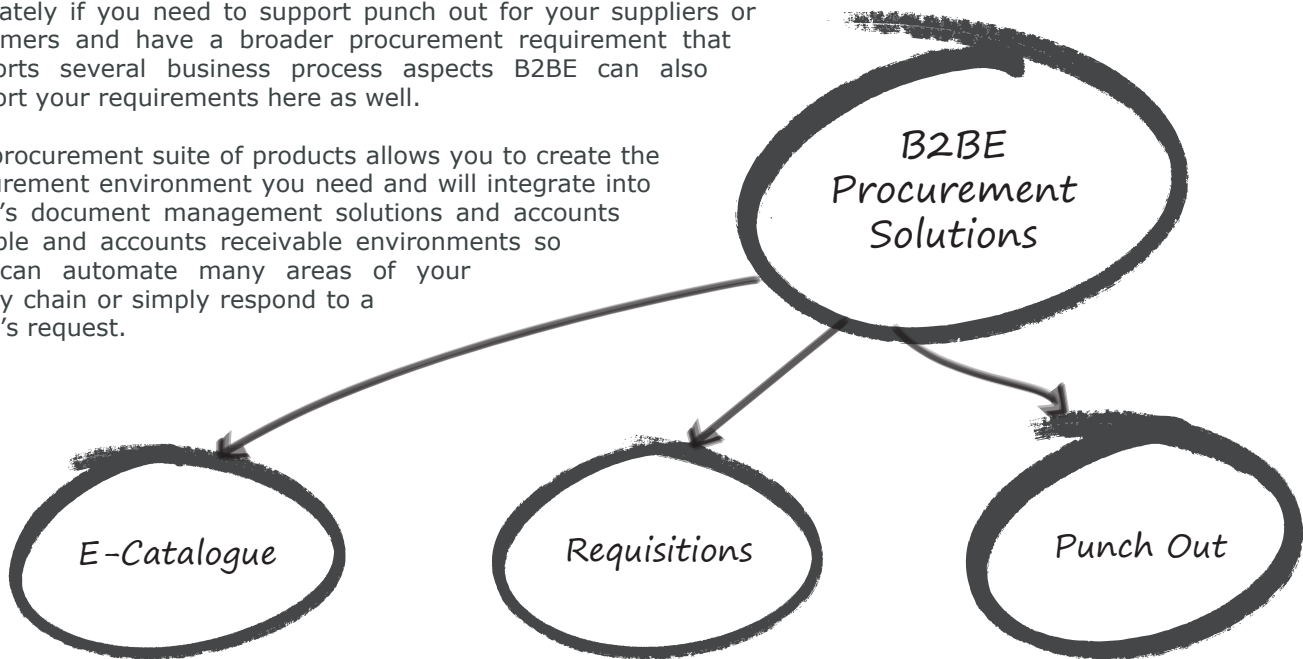

SOLUTION OVERVIEW

B2BE's procurement solutions enable your organisation to create a purchase to pay environment, support punch out requirements, create requisitions and sell your products online.

If you want to create an e-catalogue to support and drive online sales with full integration capabilities B2BE's e-catalogue will give you the tools to do this.

Likewise, if you need to create an expense procurement or requisition system with spend limits and approval workflows B2BE can also support this functionality.

Ultimately if you need to support punch out for your suppliers or customers and have a broader procurement requirement that supports several business process aspects B2BE can also support your requirements here as well.

The procurement suite of products allows you to create the procurement environment you need and will integrate into B2BE's document management solutions and accounts payable and accounts receivable environments so you can automate many areas of your supply chain or simply respond to a client's request.

B2BE Procurement Solutions

RELATED SOLUTIONS

If you're looking for a way to streamline, automate and help drive down your procurement costs B2BE offer a range of solutions to do this in part or entirely.

E-Catalogue

B2BE's e-catalogue provides the basis by which you can go to market, developing new sales channels and supporting online sales. Enable punch out capabilities for your clients or to exchange data with suppliers. It is a highly configurable and dynamic cataloguing solution.

Punch out

B2BE's punch out functionality supports OBI and OCI based standards so you can go to supplier's catalogues, browse, select goods and integrate the reverse purchase order into your ERP system. Likewise, if you have clients that want to do the same with your catalogue B2BE can support your organisation in either scenario.

Requisitions

B2BE's non-trade requisitions solution allows your organisation to manage non-trade spend so goods and services in B2BE's e-catalogued to facilitate the requisition process. The system then manages the approval process so goods and services are approved before the requisition is sent to a supplier.

RELATED PRODUCTS

B2BE's procurement solutions utilise several B2BE products to create a purchase to pay solution which is combined with a range of online applications. B2BE's procurement solutions can utilise all, or in part, any of the following products to create the exact solution your organisation needs to manage your procurement requirements.

EDI

Integrated catalogue and content data into your e-catalogue. Sales orders integrated with into your ERP? B2BE has all your bases covered with B2BE's EDI solution.

Web portal

Integrate other document management and visibility tools through the B2BE web portal, an online hosted environment that provides access to a range of B2BE's solutions which is highly customisable and configurable to enable you to collaboratively interact with your suppliers and clients.

Workflow

B2BE's procurement solutions have several dedicated plug and play workflow solutions all designed to manage the input, throughput and output of business documents, data and approval processes.
