

First Steps

PEPPOL

To understand how to get going on the PEPPOL e-delivery network there are a number of steps and questions you need to understand.

- 01 Who do you want to trade with on the PEPPOL e-delivery network?
- 02 PEPPOL currently supports invoices. However, they will in the future support other document types. Did you also want to look at these when they're available?
- 03 What system do you use? Can you get invoices out of the system, or do you already?
- 04 How do you want to send or receive your invoices? For example, SFTP, AS2, HTTPs or API?
- 05 What formats can your system support, or do you support already?
- 06 Do the invoices need more information sent in the files which your PEPPOL trading partner needs which you don't hold or manage?
- 07 If you're not trading invoices electronically at present did you also wish to combine your PEPPOL implementation with standard EDI or other e-invoice document management solutions?

Get in touch with B2BE and we can help you answer the questions in the steps and guide you through how to get going on the PEPPOL e-delivery network.

About B2BE

B2BE delivers electronic supply chain solutions globally allowing organisations to better manage their supply chain processes, providing greater levels of visibility, auditability and control. With over 20+ years of experience, the B2BE teams operate in over 20 countries and regions and speak 17 different languages. We are trusted by over 6000+ customers with more than +58,000 trading relationships.
