Print Management Solutions

When you want to automate your printed document

Solution overview

While you can automate many of your document management requirements there's still a need to print and post many documents such as invoices as some customers still prefer to receive paper.

While print and post is not the most efficient document management solution it can be automated by B2BE so you can send documents electronically to B2BE, like any other electronic document, and in fact it can be the same data stream. The printing and distribution process is then managed by B2BE so you don't need to deal with paper.

B2BE can also consolidate and optimise the mail to reduce costs. Of course, if you have a full document management solution trading partners receiving paper can be migrated over time to a more cost effective and more efficient approach. Why continue to print and post documents when B2BE can manage all your document routing and channels?

Key Features

Consolidation

B2BE's Print Management solution enables consolidation of documents to the same recipient to reduce the number of articles they receive and help reduce print and post costs. Similarly consolidation can occur over the week, or longer, so mail processes can be optimised to increase consolidation.

Visibility

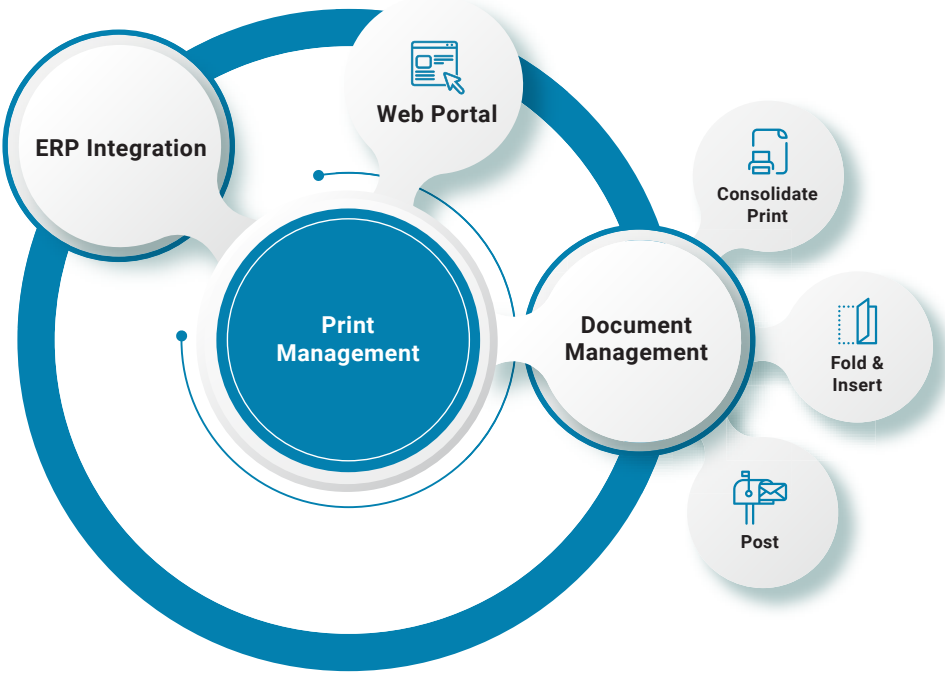

As with any B2BE Document Management solution you can see all the document sent via the print management solution and re-send documents if need be. This makes it easier for credit teams to see what is going on and monitor systems and processes when you send customer invoices, for example.

Clean mail

Address checks can be made on addresses as they pass through the system, or as an initial exercise to validate addresses to ensure the best rates can be applied. Automated notifications or rejections, if the address is unrecognisable can also be applied within the print management solution.

Consumable management

Let B2BE manage consumables so you don't need to. Whether you use plain paper or pre-printed stationary B2BE can manage all the consumables and their replenishment so you don't need to.

What you can achieve with B2BE's Print management solution

Cheaper run rates

Combining B2BE's consolidation and clean mail processes B2BE can help to reduce your mail costs. Similarly leveraging from our consumable buying rates and their management can also help reduce overheads. Ultimately your staff can do more useful things with their time.

Fully electronic

From your perspective B2BE will receive electronic files, format them to reflect your hard copy documents which means they're available online as PDF's and you no longer need to deal with paper. Similarly, the data feed B2BE receives can be the same regardless of whether the document is sent via EDI, email or B2BE's Print Management solution. Easy and flexible!

Auditable

As with all B2BE's Document Management solutions the print management solution is auditable so all documents are available online and easily accessible and if need be can be resent. The document can also be resent via another method, email, for example.

Document Management migration

If you combine B2BE's Print Management solution into a Document Management solution you can easily move mail recipients to more cost effective and automated solutions without having to make any system changes. Move a customer receiving paper invoices to email or EDI, for example.

About B2BE

B2BE delivers electronic supply chain solutions globally, helping organisations to better manage their supply chain processes, providing greater levels of visibility, auditability and control. We're driven by a passion for what we do, inspired by innovation, and underpinned by a wealth of knowledge. With over 20+ years of experience, the B2BE teams operate worldwide.
